

Retaining Wall Disclaimer

Please be advised that choosing not to install a retaining wall around your swimming pool may result in significant sloping of the yard. This could lead to potential issues with water drainage, landscape integrity, and overall safety around the pool area. You have reviewed photographs of this potential scenario with our sales associate and understand the implications of this decision. Additionally, please note that adding a retaining wall after the pool deck is installed will be more expensive due to the additional labor costs involved. By proceeding without a retaining wall, you acknowledge and accept full responsibility for any resulting effects on your property.

Below are examples of customers that originally did not opt-in for a retaining wall and later installed a retaining wall due to the slope.
