

## Stucco Finish Disclaimer

Please be advised that choosing to proceed without a finishing material (such as stucco) on the retaining wall around your swimming pool may result in an exposed, unfinished appearance. You have reviewed example photographs of this outcome with our sales team and understand the aesthetic implications of this decision.

If you choose to add a finishing material at a later date, please be aware that additional costs may apply based on the required scope of work at that time.

By proceeding without selecting a finishing material, you acknowledge and accept full responsibility for the final appearance of the wall as installed.

Below are examples of completed projects where customers chose to leave the wall unfinished compared to those who opted to include a finish.
